Education

B.Tech, Electrical and Computer Engineering — Shiv Nadar University, Greater Noida CGPA: 7.68 2027

Internships

Quantitative Research Intern — International Markets — Futures First Info Services Pvt. Ltd. May'26 - Jul'26

- Conducted research on international markets to identify tradeable patterns and inform systematic strategy design.
- Developed and automated algorithmic trading strategies using C++, Python, and Excel, translating research insights into rule-based execution logic.
- Backtested strategies against historical data to validate performance and refine trading logic before deployment.

Software Engineering Intern — NAV BackOffice May'25 - Aug'25

- Assisted in developing a Ticket Processing System (TPS) to automate issue tracking and streamline resolution workflows.
- Built a full-stack User Record Management website, implementing authentication, data validation, and CRUD operations for secure and consistent user records.
- Collaborated with cross-functional team members to debug issues, optimize backend performance, and improve UI/UX.

Projects

Creovue — Enterprise Role-Based Talent & Opportunity Platform

- Architected a role-based talent platform connecting Artists, Media, and Production Houses using Java, Spring Boot, and PostgreSQL.
- Secured endpoints using Spring Security with JWT (RBAC) and built 10+ REST APIs with centralized exception handling.
- Designed normalized PostgreSQL schemas using Spring Data JPA/Hibernate, optimizing query execution and relational mappings.

Shopper24 — Full-Stack E-Commerce Platform

- Engineered an end-to-end e-commerce platform using React.js, Spring Boot, and MySQL with dynamic search, filtering, and cart management.
- Implemented stateless authentication with JWT, secured endpoints, and deployed frontend on Netlify and backend microservices on Render.

User Entry & Analytics Platform — Full-Stack Web Application

- Designed a full-stack web platform using React, .NET, and MongoDB with validations, authentication, and CRUD operations.
- Built analytics dashboards with interactive visualization for actionable insights.

Food Image-to-Recipe & Nutrition Intelligence Engine

- Built a computer vision pipeline with TensorFlow/Keras (VGG16/CNN) and Flask to classify food dishes from uploaded images.
- Integrated 3rd-party REST APIs (Nutrition API, YouTube Data API) to dynamically fetch nutritional metrics and tutorial recipes.

Skills and Expertise

- **Programming Languages:** Java, Python, C, C++, C#, JavaScript, SQL
- **Frameworks & Web:** Spring Boot, Spring Security, React.js, REST APIs, Hibernate/JPA, .NET Core, HTML5, CSS3
- **Databases & Cloud:** PostgreSQL, MySQL, MongoDB, Netlify, Render
- **Tools & Core Concepts:** Git, Linux, Postman, VS Code, Data Structures & Algorithms, OOPs, DBMS, Operating Systems

Online Certifications & Training

- Full Stack Web Development — Udemy
- Artificial Intelligence & Machine Learning — Udemy

Extracurricular Activities

- Solved 300+ problems on LeetCode, strengthening Data Structures & Algorithms proficiency.
- College Fest Volunteer — Assisted in organizing events.
- **Hackathons & Competitions:** 2nd Rank University-wide in SIH 2023; Qualified for SIH 2025 [Zonal-Level]; Participated in Hackdata'25 (inter-college) and Envisage'25 (intra-college).

Hobbies & Interests

Coding, Open Source, Table Tennis, Public Speaking, Technical Writing, Community Engagement
